

Next generation '**Netpave50**' provides an attractive, easy to use, durable solution for the provision of car parks, pathways and access routes. The unique patented design of the paver results in an even distribution of the flexibility throughout the complete paver, even across the paver borders. An optimal connection between the **Netpave50** units makes the installation on undulating surfaces and gradients easy, without the worry of fracture or separation.

Netpave 50

Next generation

Next generation **Netpave50** can be filled with soil/grass and the cellular structure and open base enables unrestricted root growth. Alternatively it can be filled with gravel and the cellular structure will retain the stone and prevent loss or displacement. **Netpave50** can be used as part of a Sustainable Urban Drainage System (SUDS).

The **Netpave50** is an environmentally friendly product as it is produced from 100% recycled HDPE, which makes it also 100% recyclable at the end of its lifecycle.

Netpave 50

Next generation

Physical

Construction:	Injection Moulding
Composition:	Recycled HDPE
Dimensions:	50cm x 50cm x 5.0cm
Weight:	6.5 kg/m ²
Top open area:	85%
Load bearing:	up to 300 tonnes/m ²
Ecological:	100% recyclable

Shipping

Assembly:	4 tiles/m ² pre connected
m ² /pallet:	50
pallet dimensions:	1m x 1.2m x 2.35 m (L x W x H)
Weight/pallet:	340 kg
Full truck:	1300m ² tiles (=26 pallets)
20ft container:	500m ² tiles (=10 pallets)
40ft container:	1100m ² tiles (=22 pallets)

Netpave is a trademark of Conwed Plastics, patent pending EP08169582.7 and US12/264,425.

Suitability

Permanent and overspill car parks
 Drives, walkways and cycle routes
 Fire and service access roads
 Helipads
 Slopes and SUDS

Benefits

HGV load bearing capability
 Resists deformation and fracture
 Easy installation with no pegging
 Conforms to irregular surfaces and gradients
 Provides ideal source control for sustainable urban drainage systems (SUDS)
